

DAVIES

Mélisande is developing a creative approach to problem-solving inspired by her previous studies in game theory, negotiations and human rights.

Why did you choose Davies?

A Davies' lawyer told me working at Davies is about the collective quest for excellence, and that really resonated with me.

Is there something about you that we would be surprised to learn?

Strangely enough, math led me to law. Math was my favourite subject, especially algebra and solving mathematical problems. Someone told me law is like math but with words instead of numbers. It led me to investigate further and I have been captivated by it ever since.

Whom do you admire most? Why?

My grandparents, who have taught me the value of knowledge and the strength to live according to my values.
