Email

vtherrien@dwpv.com

Vincent’s previous studies in math, physics and philosophy taught him the value of logical reasoning.

Education

Collège Jean-de-Brébeuf

Law School

Université de Montréal

More About Me

What makes you eager to start your job at Davies?

This will be my first practical professional experience in the legal field, outside the classroom. I am excited to apply my learnings and I am particularly eager to work with, and get to know, the lawyers I had the chance to meet during the Course aux Stages.

What attracts you to the practice of law?

I have always appreciated my science and philosophy courses for the logical reasoning they required. I found in law the same opportunity to develop in-depth logical reasoning on very specific issues while having the possibility to evolve in the business world.

Is there an organization that means a lot to you?

The Sutton Ski Club. The people who run it mean a lot to me. Thanks to them, I have learned so much about myself and my abilities. I try to help them out as much as possible.
